

The carbon steel with organic coating and in A4 Steel, screw, pleases with a long lasting fastening, thanks to the extremely small head that becomes even more invisible in the wood as time goes by. The inverse underhead thread, that generates an excellent grip capacity for the screw, and the double notched tip allow for perfect closure of the joints as well as stable fastening. The A4 stainless steel screws guarantee high corrosion resistance, even in very aggressive environment and come also in color version for an perfectly invisible fastening.
